# Math Made Easy: 1st Grade Workbook, Ages 6-7

## Synopsis

The complete home-study program to help children practice the essential math skills they learn in school. Matches the math curriculum so your children will reach their full potential in school -- and on important standardized tests! The successful way to improve your child's math. These workbooks have been compiled and tested by a team of math experts to increase your child's confidence, enjoyment, and success at school. First Grade: Provides practice at all the major topics for Grade 1 with emphasis on addition and subtraction concepts. Includes a review of Kindergarten topics and a preview of topics in Grade 2.

## Book Information

Paperback: 200 pages

Publisher: DK Children; Workbook edition (July 1, 2001)

Language: English

ISBN-10: 0789457245

ISBN-13: 978-0789457240

Product Dimensions: 8.6 x 0.6 x 11.1 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (214 customer reviews)

Best Sellers Rank: #27,304 in Books (See Top 100 in Books) #78 in [Books > Children's Books > Education & Reference > Study Aids > Children's General Study Aids](#) #169 in [Books > Children's Books > Education & Reference > Math](#) #7956 in [Books > Reference](#)

Age Range: 6 - 7 years

Grade Level: 1 - 2

## Customer Reviews

I'm a homeschooling Dad who is the teacher for the first hour the day with my son, a first grader. For a part of that hour I spend with my son, I wanted to use a math workbook that would provide a comprehensive overview of the material a first grade student is expected to master by year-end. Quite randomly, I chose the Math Made Easy series workbook. I'm delighted I made that selection! The Math Made Easy provides an incremental, comprehensive approach to teaching math. There are 156 pages -- lessons, if you will -- to work on. Early on, your student learns how to tackle simple math problems, and then those concepts are developed into more complex problems in later lessons. This is an excellent way of learning -- incrementally and progressively. So, rather than learning everything there is to know about reading an analog and digital clock for 10 straight

lessons, the easiest concepts of all math concepts are presented early in the workbook, and then those same concepts are presented in more challenging formats (to a first grader, anyway) later in the workbook. That requires the student to recall the earlier learning that was done in the workbook, in order to tackle the more challenging problems that are presented later on. So, for instance, time-telling lessons appear on pages 29, 86, 87, 88, and 116. My son and I generally complete 2 pages in about 20 minutes. Sometimes we do 3 pages, sometimes only 1 page. We started using this workbook in late September, and we'll likely finish our workbook by February -- a complete first grade math education in about 4-5 months! Although we use the workbook for 20 minutes a day, we often spend more time -- up to 30 minutes more a day -- taking a concept presented in the book and developing it more fully on our own.

This is the second book in the "Math Made Easy" series. It will help to prepare your child for standardized tests and supports National Council of Teachers of Mathematics Standards. Not only will the lessons build confidence, all the parental notes and answers are included. You can easily tear those sections out of the back of the book. In the Answer Section with Parent's Notes, you will find all the answers to all the activities in the book. These pages will enable you to mark your children's work or they can be used by your children if they prefer to do their own marking. The notes for each page will help to correct common errors and problems and will indicate the type of practice needed to ensure your children have an understanding of where and how they made mistakes. This workbook will provide practice for all the major topics for Grade 1 with emphasis on addition and subtraction concepts. There is also a review of Kindergarten topics and a preview of Grade 2 topics. Features a progress chart complete with stars so you can stick in a star when the corresponding lesson has been completed. Contents: Numbers Numbers & Pictures Counting Review 1-20 Counting by 10s and 2s Halves and Quarters Adding Animals - counting animals in pictures and then writing in the numbers Sets Money Fun ordering stories - what happens 1st, 2nd and 3rd. Time - writing time in each box. Connect the numbers Comparisons Days & Seasons Addition, subtraction, real-life problems, digital clocks, bar graphs, symmetry, matching fractions, shapes and places, odd and even, estimating length, equations, reading calendars, properties of polygons Measurement problems 3-dimensional shapes.
