Third Grade Super Math Success (Sylvan Super Workbooks) (Sylvan Math Super Workbooks)

Synopsis

Success in math requires children to make connections between the real world and math concepts in order to solve problems. Extra practice can help young problem solvers advance to more complex topics with confidence. The activities in this workbook are designed to help your children catch up, keep up, and get ahead. Best of all, they'll have lots of fun doing it! Some of the great features you'll find inside are:

- **BASIC MATH** It's about Time! Students practice multiplying by figuring out the time spent eating, watching TV, playing soccer, and sleeping.
- **Making Change** Calculating the change from buying a candy bar, book, or T-shirt helps students reinforce adding and subtracting with money.
- **MATH GAMES & PUZZLES** Code Breaker After solving problems with addition and subtraction, multiplication, fractions, temperature, time, or money, students use the answers to solve a fun riddle.
- **Fraction Factory** Using the game board in the workbook, players see who can move the quickest through fractions of muffins to get to the box at the end.
- **MATH IN ACTION** Going Green Estimating the number of discarded plastic bottles or the fraction of trash that can be recycled in different types of bins are a few practical ways students use math to learn how to improve the environment.
- **Kate's Kitchen** In Kate's Kitchen, students practice grouping skills when they package containers of dried mango snacks, and dividing skills when they determine how many glasses of orange juice can be made out of oranges. Scaling up smoothie recipes gives multiplication practice, while making parfait desserts gives practice with fractions.

• Give your child's confidence in math a boost with 3rd Grade Super Math Success.

Book Information

Series: Sylvan Math Super Workbooks

Paperback: 320 pages

Publisher: Sylvan Learning Publishing; 1 edition (July 6, 2010)

Language: English

ISBN-10: 0375430512

ISBN-13: 978-0375430510

Product Dimensions: 8.5 x 0.8 x 10.2 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (84 customer reviews)

Best Sellers Rank: #6,959 in Books (See Top 100 in Books) #28 in [Books > Children's Books > Education & Reference > Study Aids > Children's General Study Aids](#) #85 in [Books > Science & Math > Mathematics](#) #221 in [Books > Children's Books > Activities, Crafts & Games > Activity](#)

Books

Age Range: 6 - 9 years

Grade Level: 1 - 4

Customer Reviews

As a former high school math teacher, I spend lots of time trying to teach my boy math and I have found this book to be right up our alley. Most pages have only 5 or 6 problems and I think that's about all a kid needs to get their brain going. The problems increase in difficulty from page to page so when it is all said and done I feel like he's really done a lot of thinking. What I really like about this book is that it is 3 books in one. There are basic skills (colorfully presented in a variety of ways), then games and finally real world problems. This allows your child to study every concept a bit and then review them all again in games portion and then apply them in the 3rd "book" within this 1 book. My son is a reluctant student but he hasn't put up much of a fight with this book because it isn't overly laborious and provides colorful variety. Having full color pictures of money, cupcakes, etc... has really made it all seem like stuff he should know so there is very little, if any, arguing about why we have to do math in the summer. We also give him a sticker for each sheet he completes and then as he meets milestones he gets rewards. This book was great for us. I also find that we can breeze through a pages during a meal. I'll show him the pages, he does all the thinking and I write in the answers so he can eat before supper gets cold. Pretty painless for everyone and he's so prepared for 2nd grade that they'll hopefully skip that and let him stick with 3rd or 4th grade content.

My children love these workbooks. They beg to do these workbooks. The pages are very engaging and colorful. The games, riddles, jokes, and puzzles make math a lot of fun. In the first third of the book there are brief explanations on how to do the problems (a little teaching/explaining, but not much). Plus, they are a good size workbook for a good price. We bought our first set at Costco to get ahead for the next year (awesome summer practice!) and have since used them for homeschooling while moving (bought on). Highly, highly recommend!

This workbook does not contain a lot of practice for the basic math computations: addition, subtraction, multiplication and division. It does however provide plenty of critical thinking exercises. The pages are colorful and the instructions are for the activities are easy for my child to understand. He has enjoyed using this book for extra practice.

My second grader wanted to get a third grade math activity book to get a head start for next school year. We received it and he started working on it right away. The book is very easy to understand and is full of useful and colorful illustrations which help kids to visualize each exercise. It really worked for us! Thank you .

My child has a history of forgetting to bring homework home. I used this book as a back up in these instances. Somehow, my child is now ahead of the class in math. So gotta give it kudos. Would have given five stars except my child hates doing it and sometimes have to skip pages because they are too easy.

My children really enjoy these books and they have re-ignited their love of math. They're really excited by the idea of playing the games, I'm really excited by the idea that these books cover everything they need to know for their state standards and then some. :)

Excellent book for learning on kid spare time I bought this for summer vacation so they can have something to learn on in the book it's great my 3rd great son enjoys doing because it's just one page a day
