Customer Reviews

This was a product recommended by my son's tutor. The answer key wasn't really necessary for me since he does the work with his tutor but it helps to cement the process for me to see the answers too. Easy to follow and the "hand written" answers make it seem friendlier. Good seller.

No Common Core. We searched a long time trying to find math books that didn't go Common Core for doing home school. My wife was familiar with these so we got them and love them. Don't go the Common Core route.

The description of this item lead me to believe it included the 4 key to books, it does not! It is only the answer key. I ended up ordering all 4 books with answer key for less, from manufacturers web site.
