ISBN-10: 059052285X

ISBN-13: 978-0590522854

Product Dimensions: 9 x 6 x 0.2 inches

Shipping Weight: 3.2 ounces

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (3 customer reviews)

Best Sellers Rank: #1,161,701 in Books (See Top 100 in Books) #8 in [Books > Children's Books > Growing Up & Facts of Life > Difficult Discussions > Disaster Preparedness](#) #814 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Weather](#) #9203 in [Books > Children's Books > Literature & Fiction > Chapter Books & Readers > Beginner Readers](#)

Customer Reviews

I thought this book was very well-illustrated for young children. The charts and tables and diagrams were easy to understand, and attracted interest in the text. This was an important book for me to read with my grandchildren because we live in New Mexico, where lightning is an almost daily event. As with the Floods book in this series, it features a female scientist and young girls in the illustrations, which really helps my granddaughters to relate to the information. The science is clear. My granddaughters really grasped the concepts, and could even use the book to observe our lightning storms. For example, the books says to close your eyes right after a lightning strike and you can see the pattern of the lightning, in miniature, on your eyelids. It really works!

The kids like all the books in this series--hurricanes, tornadoes and lightning being the favorites. They're easy to read and present the science in a very engaging and friendly way. I like the mix of

personal stories and science information, especially.

Purchased this book for my daughter who is afraid of storms. Read through it in advance, the material is full of stories of people being harmed by lightening. May be suitable and entertaining for those who want to learn more stories or about the science of lightening, but not in order to demystify and calm fears.
